Lukas Carvajal

lukascarvajal@gmail.com | http://lukascarvajal.com
Github: https://github.com/lcarvajal

- Won Lacuna Open Build Hackathon.
- Awarded Best New App from Apple for Tip Yourself.
- Studied math at Free University of Berlin and economics/comp-sci at Florida State.

Experience

Tip Yourself - https://www.tipyourself.com
CTO, Co-founder - Swift, Ruby on Rails

- Scaled to over 20,000 users, reaching 19th top finance app on Apple App Store.
- Led a team of two developers and was mentored by two senior level engineers.

Apps by Lukas - http://appsbylukas.com
CEO, Founder - Objective-C, Java

- Worked with five satisfied clients and two awesome developers.
- Built a number of iOS and Android applications.

Sample Apps

Farbe - http://farbeapp.com
iOS and iMessage - Utility

- The most simple app for letting your mind wander through drawings.
- Implemented Messages extension to use drawings as stickers.
- Built MEAN stack backend for storing canvases and adding friends.

Fraze Frame - http://frazeframe.com
iOS and Android for Client - Social Network

- Social network for college students to rate each other's photos and win prizes.
- Allows users to take photos, upload photos, apply filters, add photos to categories, up and down vote photos, upload profile and background pictures.

News Hack - https://lcarvajal.github.io/News-Hack
iOS and Android - Media

- Accesses New York Times, USAToday, and Wall Street Journal articles for free.
- Built a LAMP web service, which parses news websites or uses their API every 20 minutes for the most up-to-date articles. The app makes calls to this web service.
